

Hello Clumber Breeders and owners,

Please be sure to partake in the CSCA Health Committee Survey.

The recommended tests we have now are based on what we know at this time to be an issue in the breed, but with this survey, we are trying to learn if there are any additional concerns or issues that can be tested for that we should add to the breeders' guidelines of recommended testing for breeders.

This brief survey is anonymous and is only to guide an informed decision on additional recommended health tests and is not intended to be a general survey on the health of Clumber Spaniels. For example, the survey does not ask any questions about eye health, as an eye exam is already part of the required testing.

The survey deadline is April 30th, 2021 so we can address the results at the National Specialty in May.

Please help us improve the health of future clumbers!

Thank you in advance for your participation.
