Phone Interview

We are happy to answer any questions via email about Clumbers and the screening process requirements to adopt. We do require a phone interview with a member of our committee to familiarize ourselves with your home and family, your history of pet ownership, and what your interests are with Clumbers. They come from a variety of circumstances and our goal is to make the most compatible placement for both the adoptive home and the Clumber.

We stay in touch with all adoptive homes and offer whatever pre and post placement assistance a home may need. Adoptive homes are our most important asset as its their commitment and loving care that offers a great life for any Clumber.
